

## Unidad de Proteínas Últimas publicaciones

Martín de la Vega C, Jozef Burda and Matilde Salinas. (2001) Ischemia-induced inhibition of the initiation factor  $2\alpha$  phosphatase activity in the rat brain. *NeuroReport* 12, 1021-1025.

Muñoz F, M.E. Martín, M. Salinas and J.L. Fando. (2001) Carbonyl cyanide p-trifluoromethoxyphenylhydrazone (FCCP) induces initiation factor  $2\alpha$  phosphorylation and translation inhibition in PC12 cells. *FEBS Lett.* 492, 156-159.

Martín de la Vega C, J. Burda, C. Quevedo, A. Alcázar, M. E. Martín, J.L. Fando and M. Salinas. (2001) Possible mechanisms involved in the translation down-regulation during transient global ischemia in the rat brain. *Biochem. J.* 357, 819-826.

Víctor M. González, Miguel A. Fuertes, Carlos Alonso and José M. Pérez (2001) Is Cisplatin-induced Cell Death Always Produced by Apoptosis?. *Mol Pharmacol.* 59(4):657-663

Fuertes MA, José M. Pérez, Víctor M. González, and Carlos Alonso (2001) A kinetic model for the B-Z transition of poly[(dG-C)]. poly[(dG-C)] and poly[(dG-m5C)]. poly[(dG-m5C)]. *J. Inorg. Biol. Chem.* 6:675-682

Quevedo C, Matilde Salinas, and Alberto Alcázar. (2002) Insulin-like growth factor-1 induces the eukaryotic initiation factor 4F assembly in neuronal cells. *Biochem. Biophys Res. Commun.* 291, 560-566.

Palacios C, Constantino Cespón, Cristina Martín de la Vega, Garbiñe Roy, Antonio Serrano, Matilde Salinas and Pedro González-Porqué (2002). Lauryl gallate inhibits the activity of protein tyrosine kinase c-src purified from human platelets. *J. Enzy. Inh.* 16, 527-533.

Martín de la Vega C, Jozef Burda, M.Val Toledo Lobo and Matilde Salinas. (2002) Cerebral postischemic reperfusion-induced demethylation of the protein phosphatase 2A catalytic subunit. *J. Neurosci. Res.* 69, 540-549.

Alvarez C, Víctor M. González, and Antonio Jimenez (2002) Be careful with the primers when screening your clones by PCR. *Anal. Biochem.* 308, 89-191.

Cid C, Jose C. Alvarez-Cermeño, Ignacio Regidor, Matilde Salinas, Alberto Alcazar (2002) Low concentrations of glutamate induce apoptosis in cultured neurons: implications for amyotrophic lateral sclerosis. *J. Neurol. Sci.* 193, 103-109.

Álvarez-Cermeño JC, C. Cid, I. Regidor, J. Masjuan, M. Salinas, A. Alcázar. (2002) Efecto del líquido cefalorraquídeo en los cultivos neuronales: implicaciones en la patogenia de la esclerosis múltiple. *Rev. Neurol.* 35, 994-997.

Cid C, J.C. Álvarez-Cermeño, I. Regidor, J. Plaza, M. Salinas, A. Alcázar (2003) Caspase inhibitors protect from neuronal apoptosis induced by cerebrospinal fluid from multiple sclerosis patients. *J. Neuroimmunol.* En prensa

Álvarez N, González VM and Jiménez-Ruiz A. Be careful with the primers when screening your clones by polymerase chain reaction. *Anal Biochem* 2002; 308:189-91.

Cid C, Alcázar A, Regidor I, Masjuan J, Salinas M and Alvarez-Cermeño JC. Neuronal apoptosis induced by cerebrospinal fluid from multiple sclerosis patients correlates with hypointense lesions on T1 magnetic resonance imaging. *J Neurol Sci* 2002; 193:103-9.

Burda J, Hrehorovská M, Bonilla LG, Danielisová V, Cizkova D, Burda R, Nemethová M, Fando JL and Salinas M. Role of protein synthesis in the ischemic tolerance

acquisition induced by transient forebrain ischemia in the rat. *Neurochem Res* 2003; 28:1213-9.

Cid C, Alvarez-Cermeño JC, Regidor I, Plaza J, Salinas M and Alcázar A. Caspase inhibitors protect against neuronal apoptosis induced by cerebrospinal fluid from multiple sclerosis patients. *J Neuroimmunol* 2003; 136:119-24.

Cid C, Alvarez-Cermeño JC, Regidor I, Salinas M and Alcazar A. Low concentrations of glutamate induce apoptosis in cultured neurons: implications for amyotrophic lateral sclerosis. *J Neurol Sci* 2003; 206:91-5.

Cid C, Álvarez-Cermeño JC, Salinas M and Alcázar A. Los inhibidores de caspasas protegen contra la apoptosis neuronal indicada por el líquido cefalorraquídeo de pacientes con esclerosis múltiple. *Esclerosis Múltiple* 2003; 2:18-23.

Moreno M, Rincón E, Pineiro D, Fernández G, Domingo A, Jiménez-Ruiz A, Salinas M and González VM. Selection of aptamers against KMP-11 using colloidal gold during the SELEX process. *Biochem Biophys Res Commun* 2003; 308:214-8.

O'Loughlen A, Pérez-Morgado MI, Salinas M and Martín ME. Reversible inhibition of the protein phosphatase 1 by hydrogen peroxide. Potential regulation of eIF2 alpha phosphorylation in differentiated PC12 cells. *Arch Biochem Biophys* 2003; 417:194-202.

Quevedo C, Salinas M and Alcázar A. Initiation factor 2B activity is regulated by protein phosphatase 1, which is activated by the mitogen-activated protein kinase-dependent pathway in insulin-like growth factor 1-stimulated neuronal cells. *J Biol Chem* 2003; 278:16579-86.

Cid C, Alvarez-Cermeño JC, Camafeita E, Salinas M and Alcázar A. Antibodies reactive to heat shock protein 90 induce oligodendrocyte precursor cell death in culture. Implications for demyelination in multiple sclerosis. *Faseb J* 2004; 18:409-11.

García L, O'Loughlen A, Martín ME, Burda J and Salinas M. Does phosphorylation of eukaryotic elongation factor eEF2 regulate protein synthesis in ischemic preconditioning? *J Neurosci Res* 2004; 77:292-8.

García L, Burda J, Hrehorovská M, Burda R, Martín ME and Salinas M. Ischaemic preconditioning in the rat brain: effect on the activity of several initiation factors, Akt and extracellular signal-regulated protein kinase phosphorylation, and GRP78 and GADD34 expression. *J Neurochem* 2004; 88:136-47.

Imaizumi K, Benito A, Kiryu-Seo S, González V, Inohara N, Lieberman AP, Kiyama H and Nunez G. Critical role for DP5/Harakiri, a Bcl-2 homology domain 3-only Bcl-2 family member, in axotomy-induced neuronal cell death. *J Neurosci* 2004; 24:3721-5.

O'Loughlen A, González VM, Salinas M and Martín ME. Suppression of human Mnk1 by small interfering RNA increases the eukaryotic initiation factor 4F activity in HEK293T cells. *FEBS Lett* 2004; 578:31-5.

O'Loughlen A, González VM, Piñeiro D, Pérez-Morgado MI, Salinas M and Martín ME. Identification and molecular characterization of Mnk1b, a splice variant of human MAP kinase-interacting kinase Mnk1. *Exp Cell Res* 2004; 299:343-55.

Burda J, Matiasova M, Gottlieb M, Danielisová V, Nemethová M, Garcia L, Salinas M and Burda R. Evidence for a role of second pathophysiological stress in prevention of delayed neuronal death in the hippocampal CA1 region. *Neurochem Res* 2005; 30:1397-405.

Cid C, Alvarez-Cermeño JC, Salinas M and Alcázar A. Anti-heat shock protein 90beta antibodies decrease pre-oligodendrocyte population in perinatal and adult cell cultures. Implications for remyelination in multiple sclerosis. *J Neurochem* 2005; 95:349-60.

Martín ME, Munoz FM, Dickinson DA, Forman HJ, Martin del Río R, Salinas M and Fando JL. Protective effect of L-trans-pyrrolidine-2,4-dicarboxylic acid preload against cell death induced by oxygen/glucose deprivation in differentiated PC12 cells. *J*

Alzate JF, Alvarez-Barrientos A, González VM and Jiménez-Ruiz A. Heat-induced programmed cell death in *Leishmania infantum* is reverted by Bcl-X(L) expression. *Apoptosis* 2006; 11:161-71.

Alzate JF, Ramírez-Pineda JR, González VM, Patino E, Vélez ID and Jiménez-Ruiz A. *Leishmania (Viannia) panamensis*: cloning of the histone H1 genes by representational difference analysis. *Exp Parasitol* 2006; 112:126-9.

Burda J, Danielisová V, Némethova M, Gottlieb M, Matiasova M, Domoráková I, Mechirová E, Feriková M, Salinas M and Burda J. Delayed postconditioning initiated additive mechanism necessary for survival of selectively vulnerable neurons after transient ischemia in rat brain. *Cell Mol Neurobiol* 2006; 26:1141-51.

García-Bonilla L, Burda J, Piñeiro D, Ayuso I, Gómez-Calcerrada M and Salinas M. Calpain-induced proteolysis in ischemia and ischemic preconditioning. *Neurochem Res* 2006; 31:1433-1441.
